# **Meta Study**

## CHAPTER 8 – META STUDY

The **Meta Study** module contains findings from other studies in the BRICS system that have been aggregated by researchers to conduct additional analysis. The information within the Meta Study can be referenced in publications through a Digital Object Identifier (DOI). Meta Study may also be used as a means for storing and referencing (via DOI) results of analysis that are not otherwise in the BRICS system.

### 8.1 OBJECTIVE

This chapter provides information for users on how to:

- ❖ Manage Meta Studies
- ❖ Upload and store meta study artifacts and documentation
- ❖ Define and manage meta study information
- ❖ View Meta Studies
- ❖ Create a Meta Study

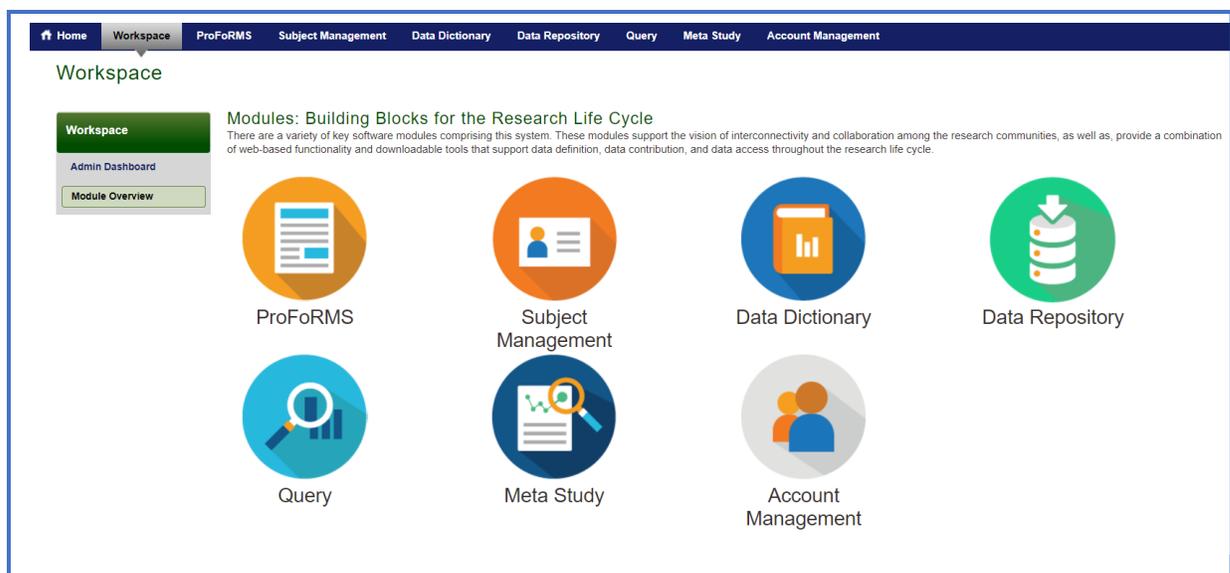

### 8.2 MODULE NAVIGATION

The **Meta Study** module is available within the BRICS Workspace.

### 8.3 USING META STUDY

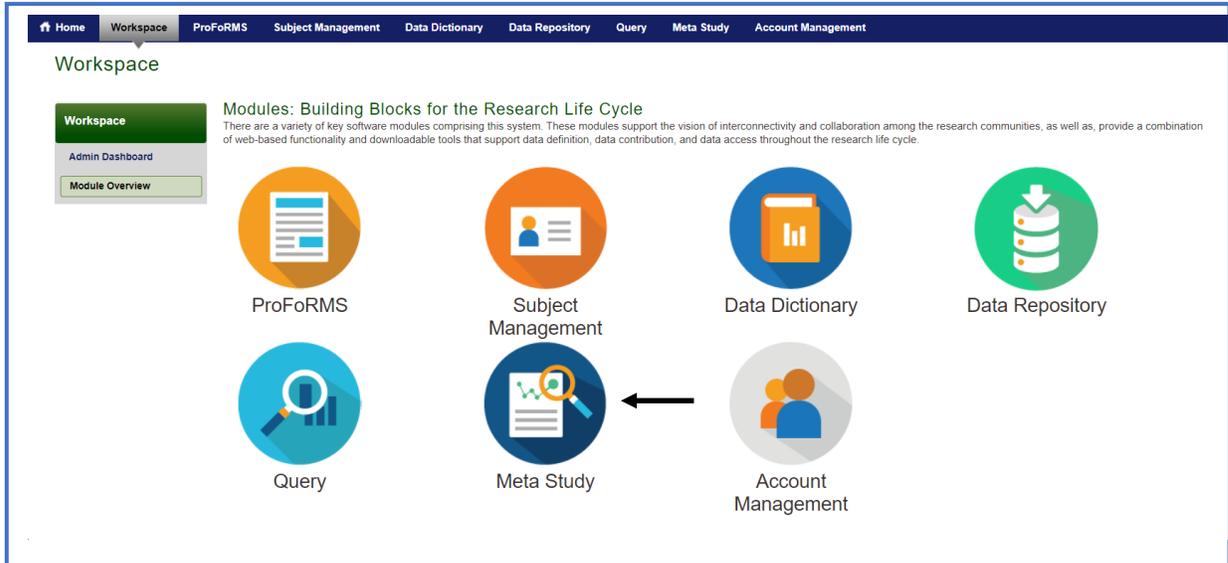

To access the **Meta Study** module: Perform the following actions:

1. Login into BRICS and navigate to your Workspace where all modules you have access to are displayed.

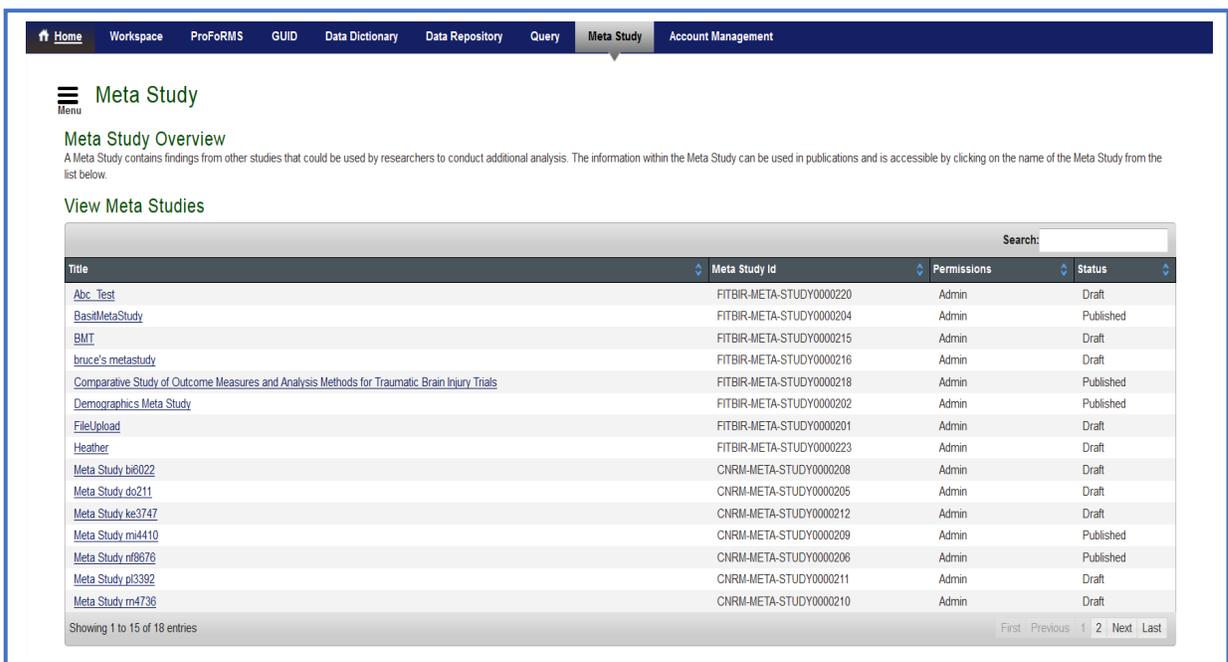

The screenshot displays the BRICS Workspace interface. At the top, a navigation bar includes links for Home, Workspace, ProFoRMS, Subject Management, Data Dictionary, Data Repository, Query, Meta Study, and Account Management. The main content area is titled "Workspace" and features a sidebar with "Admin Dashboard" and "Module Overview". A central text block reads "Modules: Building Blocks for the Research Life Cycle" and describes the system's goal of supporting interconnectivity and collaboration. Below this, seven circular icons represent different modules: ProFoRMS, Subject Management, Data Dictionary, Data Repository, Query, Meta Study, and Account Management. The Meta Study icon is highlighted with a magnifying glass, indicating it is the focus of the chapter.

- Click the **Meta Study** module from your Workspace. **Note:** If the module is “greyed out” then you do not currently have access to the module. Please reach out to BRICS Operations to inquire about gaining access to the Meta Study module.

- The Meta Study Overview Screen displays with the list of Meta Studies available in the data repository.

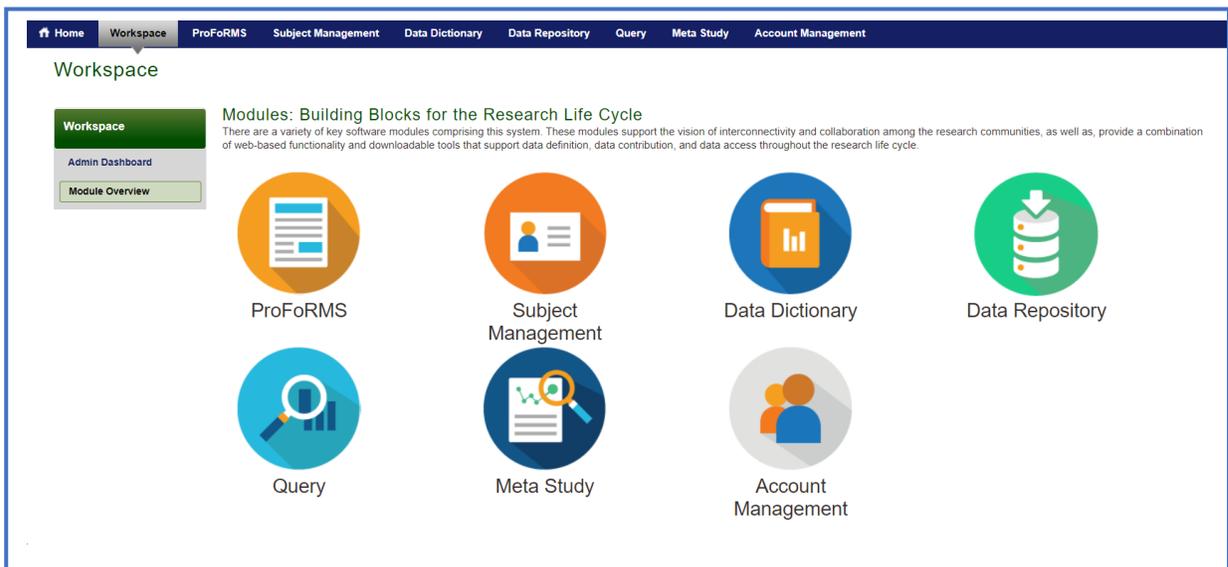

## 8.4 VIEW META STUDY

The **View Meta Studies** screen contains findings from other studies that could be used by researchers to conduct additional analysis. The information within the Meta Study is accessible by clicking on the name of the Meta Study from the list below.

**To view Meta Study:** Perform the following actions:

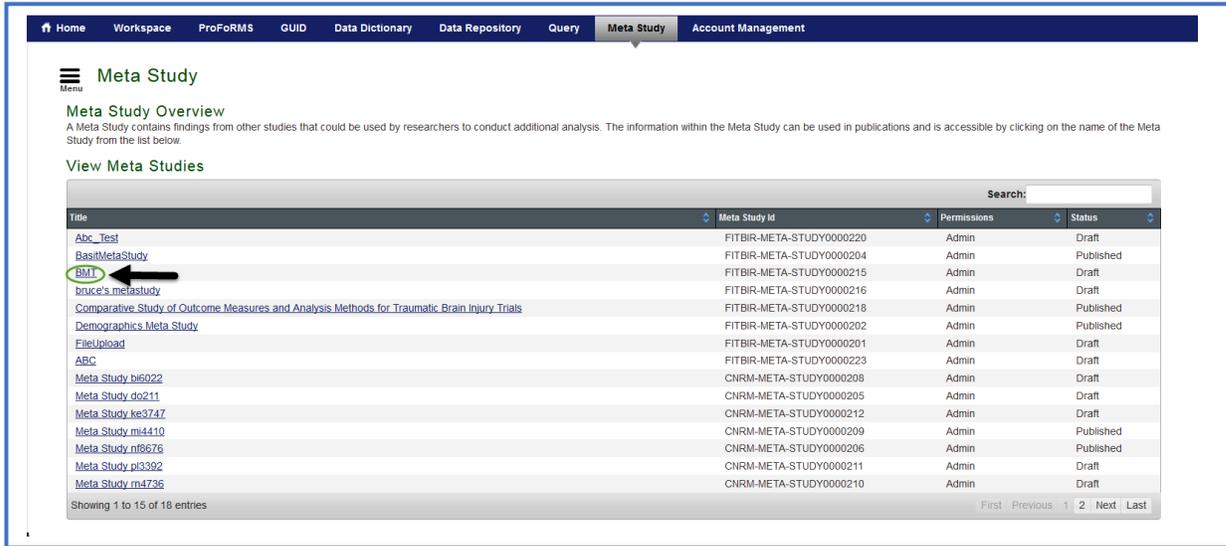

1. Login and navigate to the **Workspace** screen where all modules you have access to are displayed.

2. Click the **Meta Study** module to enter Meta Study. The Meta Study Overview Screen displays.

- You may Click on the name of the Meta Study from the list below to view the Meta Study **OR** go straight to **Step 5** below:

## 8.5 CREATE META STUDY

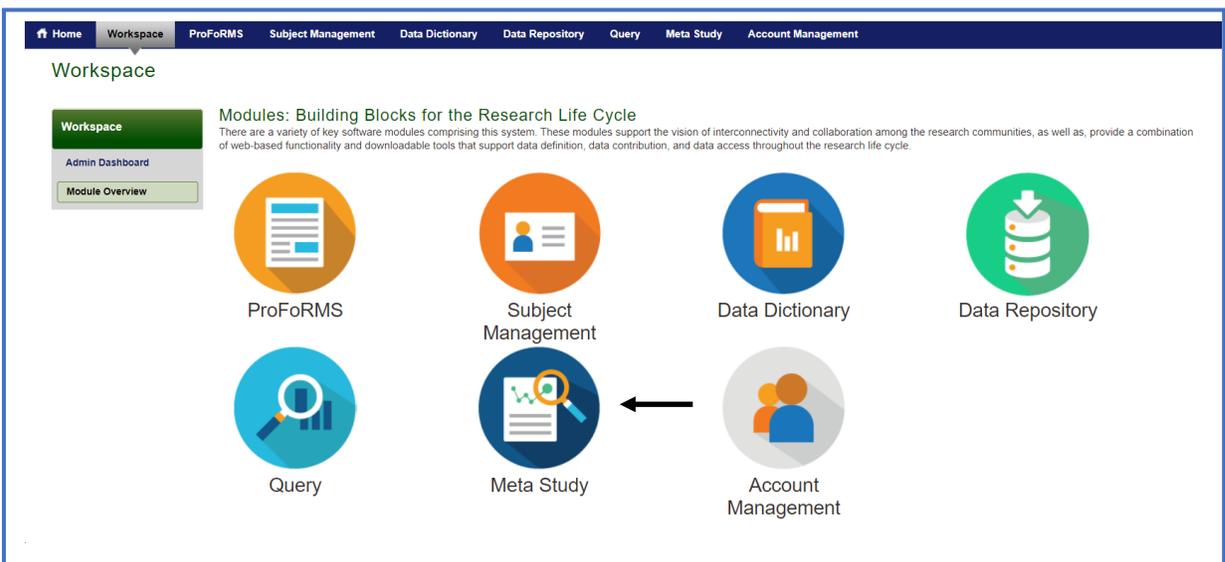

The **Create Meta Study** function allows you to create Meta Study information by entering the mandatory fields in the fields provided. Upon entering the mandatory fields, and submitting the request, a System Administrator must approve the request before you may begin submitting data to the Meta Study.

**To create Meta Study:** Perform the following actions:

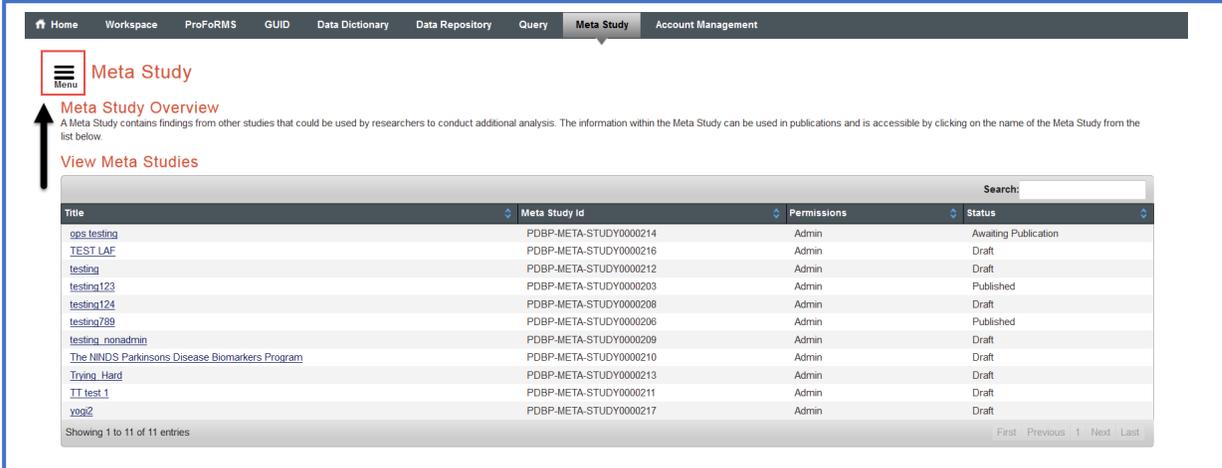

1. Login and navigate to the **Workspace** screen where all modules you have access to are displayed.

2. Click the **Meta Study** module to enter Meta Study. The Meta Study Overview Screen displays.

- Click on the collapsible **Menu** button to expand the Meta Study menu options on the left tool bar.

5. Enter the study information in the mandatory fields (mandatory fields are marked with \*). Please Select a Primary Principal Investigator to create a study by clicking at **Add to Table** button. **Note:** If a Clinical Trial, you must enter the **Clinical Trial ID** and Click the **Add to Table** button.

Once you have completed the mandatory fields, click the **Next** button. A System Administrator will review your study request. Once the System Administrator approves your request, you can start submitting data to the study. You will not be able to submit your study for approval until all required fields are answered.

The Mandatory information are listed as follows:

**Study Overview** (*Title, Abstract, Study Type*); **Study Research Management** (*First Name, Last Name, Organizational Name*); **Study Information** (*Primary Funding Source*).

**Meta Study**

## Meta Informaton Section Descriptions

**Details:** Section and data attributes are intended to define the study, publication details, and DOI assignment and status. Section provides an introduction of the Meta Study and serves as the foundation for study definition and system categorization. This sections contains additional details to include: *[Title, Meta Study ID, Meta Study ID Schema, Recruitment Status, Study Type, Therapeutic Agents, Therapy Types, Therapeutic Targets, Model Names, Model Types, Study URL, Duration, Status, DOI, Abstract, Aims, Permission, Owner, Owner Email]*.

**Study Research Management:** Common set of predefined attributes associated with any/all Studies and Meta Studies. Section identifies research team roles (*e.g. Primary Principal Investigator*) and associated role names, email addresses, and affiliations. Data captured is required for both BRICS and the generation of a Digital Object Identifier (DOI); allowing researchers to cite data from BRICS instances in their publications in a more traceable manner. Data attributes provided represent the minimum amount of information required for the generation and assignment of a DOI.

This sections contains the study research management information to include: *Title, Full Name, Email Address, Organization Name, and Picture file.*

**Study Information:** Intent is to provide information about primary funding, clinical grant IDs, and other pertinent funding resources associated with the Meta Study. Data captured is validated and shared with [clinicaltrials.gov](http://clinicaltrials.gov), which provides a secondary resource for accessing public study data. Fields in this section include: *[Primary Funding Source (Org/Institute); [Clinical Trial ID Number]; [Grant/Project ID Number]; [Grant/Project Name]; and [Grant/Project Funders Name]*.

**Documentation:** Provides users the ability to document citations for their Meta Study by allowing direct linking with publications through the PubMed API, attachment of hyperlinks, and reference file upload(s) (.pdf, .doc, .csv, etc.). Available options include: *[Files and URL]*

**Data Artifact:** The intent of this section is to provide public users study-data in the form of query filters and files. Displays saved queries from the Query Tool that were referenced for the meta-study. Saved query details include: referenced studies, form joins, filter name, filter description, permissions, and specific dataset filters. Section also allows for filtered datasets to be directly uploaded for future reference/export (.csv), as an alternative to accessing the data via the Query Tool.

This secton contains data artifacts that describe the type of saved query to include: *Source, Type, Description, Date Uploaded, and Data.*

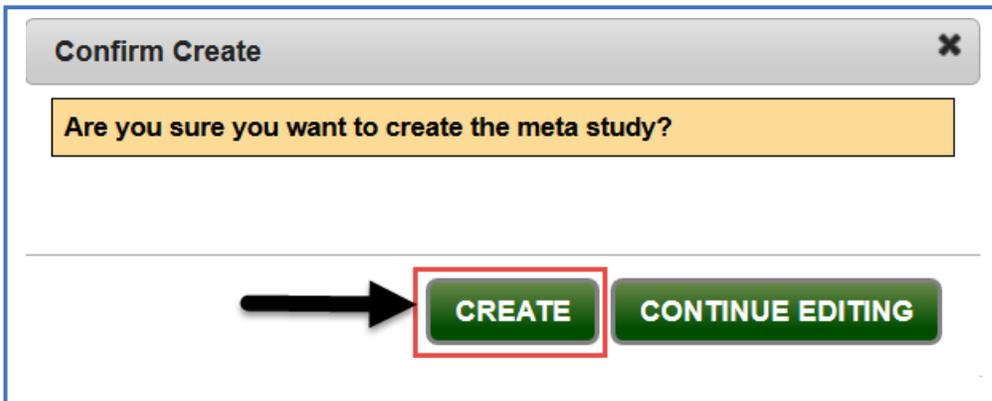

**Keywords and Labels:** The intent of this feature is to maximize search efficiency within BRICS and 3rd party repositories through the use of common tags (keywords/labels). Researchers can associate (*use existing system tags*) and create new keywords/labels in order to minimize and target search results.

**Data Access Report:** The intent of this feature is to allow users the ability to retrieve study-data download information for a particular Meta Study. The Data Access Report

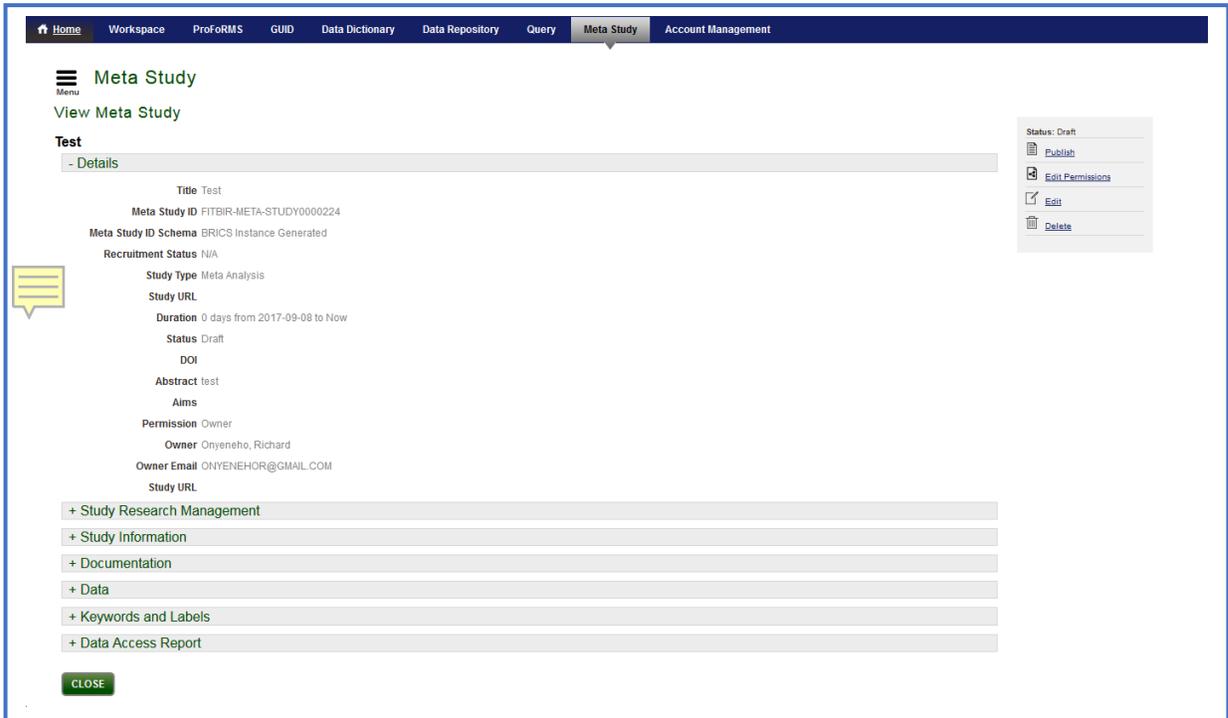

section will show a report about individuals that have accessed the data associated with the meta-study and provide their user name, first name, last name, and download date. Researchers who publish a Meta Study can gain insight into specific users who have viewed and referenced their study. This section contains the [DOI, File Name, User Name, and Download Date].

**Quick Stats:** Method to aggregate statistical information using pre-defined analysis associated with the Data Access report section (*no user input necessary*). Section captures: 1) Total Number of Data File Downloads; 2) Total Number of Documentation File Downloads; 3) Total Number of Downloads; and 4) Total Number of MB (*total file download size*). Selected analysis provides stats to Researchers as to data access and download volume, without having to download the Data Access Report (.csv file).

- 20. A pop-up **Create Confirmation** page appears with the message: **“Are you sure you want to create the meta study?”** Click the **Create** button to create the Meta Study. If you decide to continue editing the form, you must click the **Continue Editing** button.

21. The View Meta Study page appears with the newly created Meta Study information. As shown below:

## 8.6 PUBLISH A META STUDY

To Publish a [Meta Study](#): Perform the following actions:

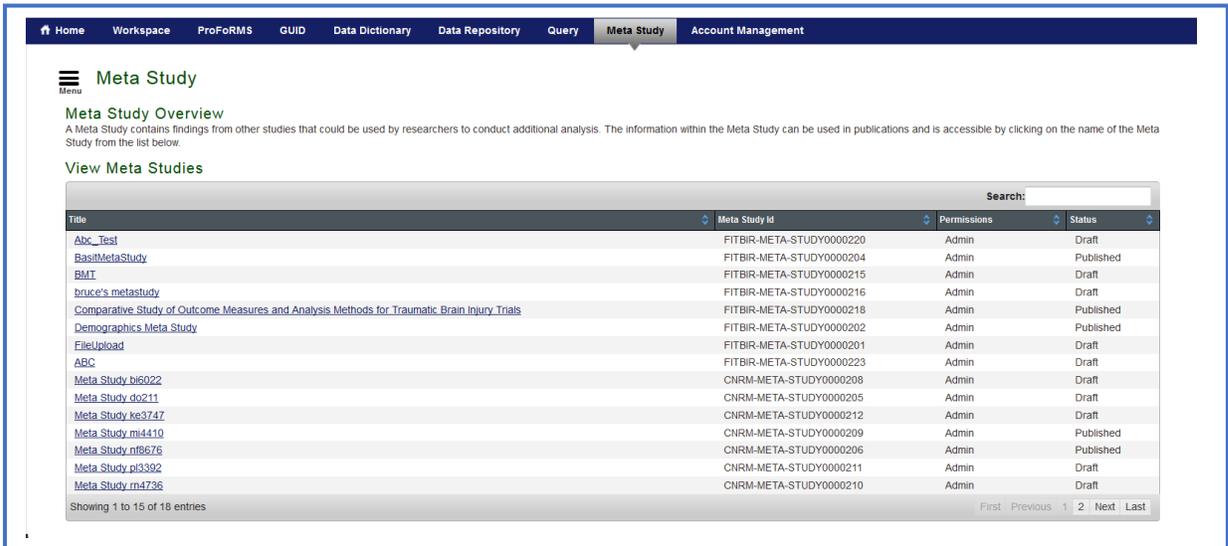

1. Login into BRICS and navigate to your Workspace where all modules you have access to are displayed.

2. Click the **Meta Study** module from your Workspace. **Note:** if the module is greyed out then you do not have access to the module. Please reach out to BRICS Operations to inquire about access should you not have access.

3. The **Meta Study Overview** screen displays with the list of Meta Studies available in the data repository.

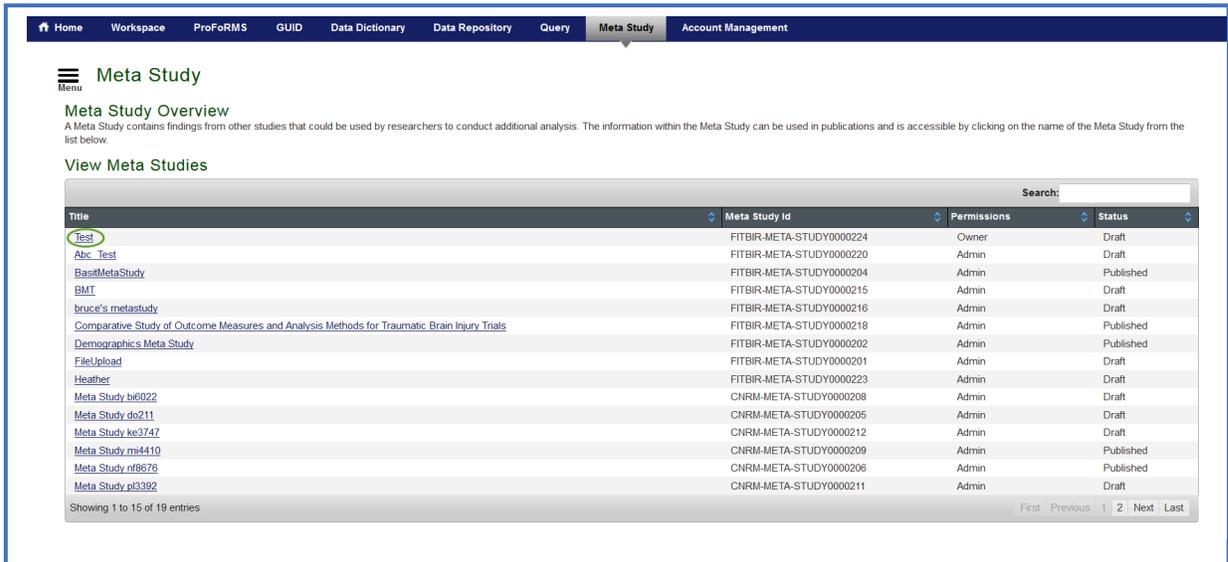

**Meta Study Overview**  
A Meta Study contains findings from other studies that could be used by researchers to conduct additional analysis. The information within the Meta Study can be used in publications and is accessible by clicking on the name of the Meta Study from the list below.

**View Meta Studies**

- The **View Meta Study** page appears. Click on the **Publish** link located on the upper right-hand corner.

- A Pop-up confirmation window opens with the question: *“Are you sure you want to publish? Further changes will not be allowed without first un-publishing the Meta Study.”* Click the **Publish** button.

7. The Status changes from **Unpublished** to **Published** are then shown on the upper right-hand corner in the Meta Study information.

The screenshot displays the BRICS Meta Study interface. At the top, a navigation bar includes links for Home, Workspace, ProFoRMS, GUID, Data Dictionary, Data Repository, Query, Meta Study, and Account Management. The main content area is titled "Meta Study" and "View Meta Study". Below this, a "Test" section is expanded to show "Details". The details include:

- Title: Test
- Meta Study ID: FITBIR-META-STUDY0000224
- Meta Study ID Schema: BRICS Instance Generated
- Recruitment Status: N/A
- Study Type: Meta Analysis
- Study URL
- Duration: 2 days from 2017-09-08 to 2017-09-10
- Status: Published
- DOI
- Abstract: test
- Aims
- Permission: Owner
- Owner: DOE, Jane
- Owner Email: jane.doe@GMAIL.COM
- Study URL

At the bottom of the details section, there are expandable sections for:

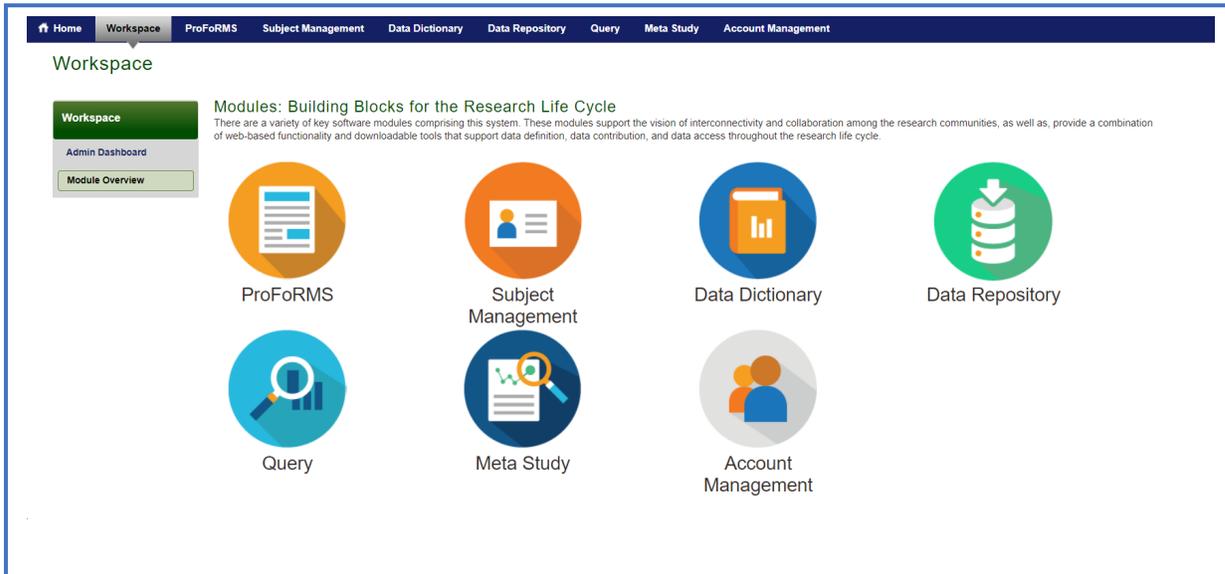

- + Study Research Management
- + Study Information
- + Documentation
- + Data
- + Keywords and Labels
- + Data Access Report

A "CLOSE" button is located at the bottom left. In the top right corner, a status dropdown menu is visible, with "Status: Published" selected and circled in green. A black arrow points from the "Published" status text in the details section to this dropdown menu.

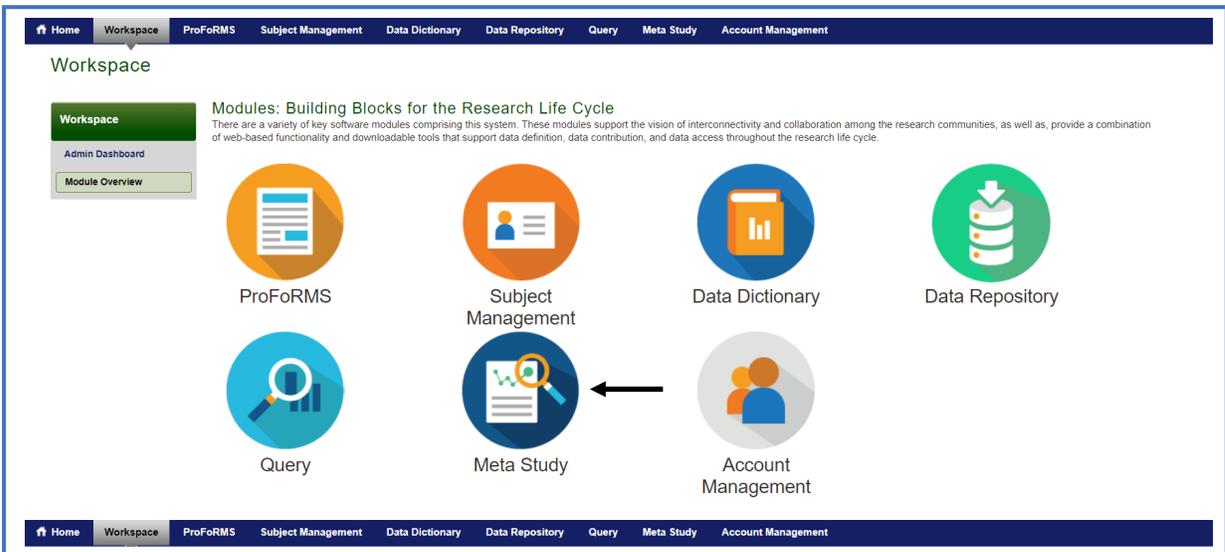

## 8.7 EDIT PERMISSIONS

To Edit [Permissions](#): Perform the following actions:

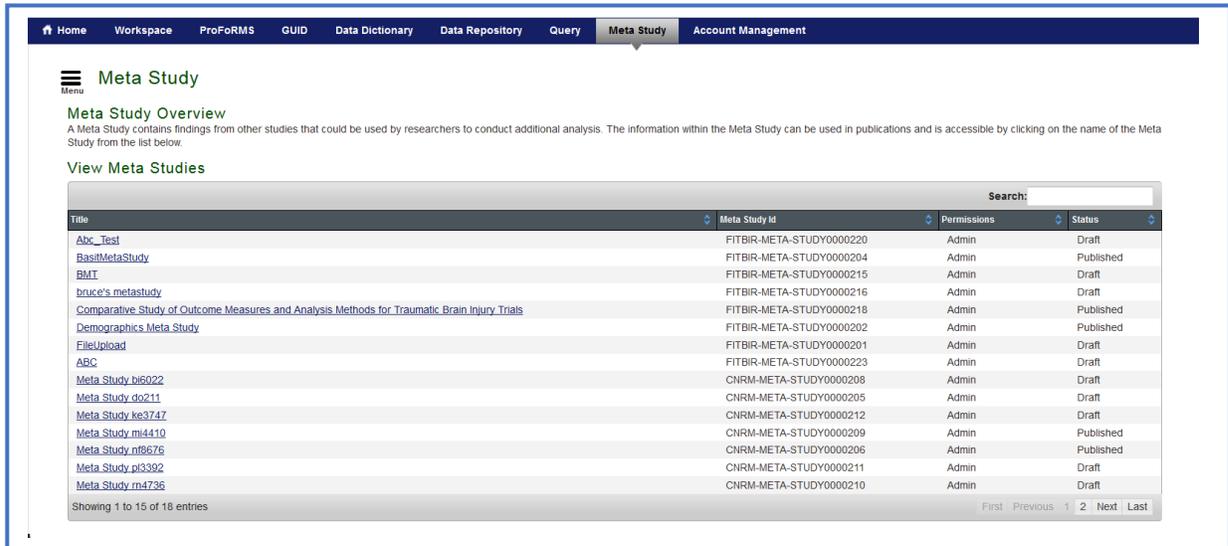

1. Login into BRICS and navigate to your Workspace where all modules you have access to are displayed.

2. Click the **Meta Study** module from your Workspace. **Note:** if the module is greyed out then you do not have access to the module. Please reach out to BRICS Operations to inquire about access should you not have access.

- The **Meta Study Overview** screen displays with the list of Meta Studies available in the data repository.

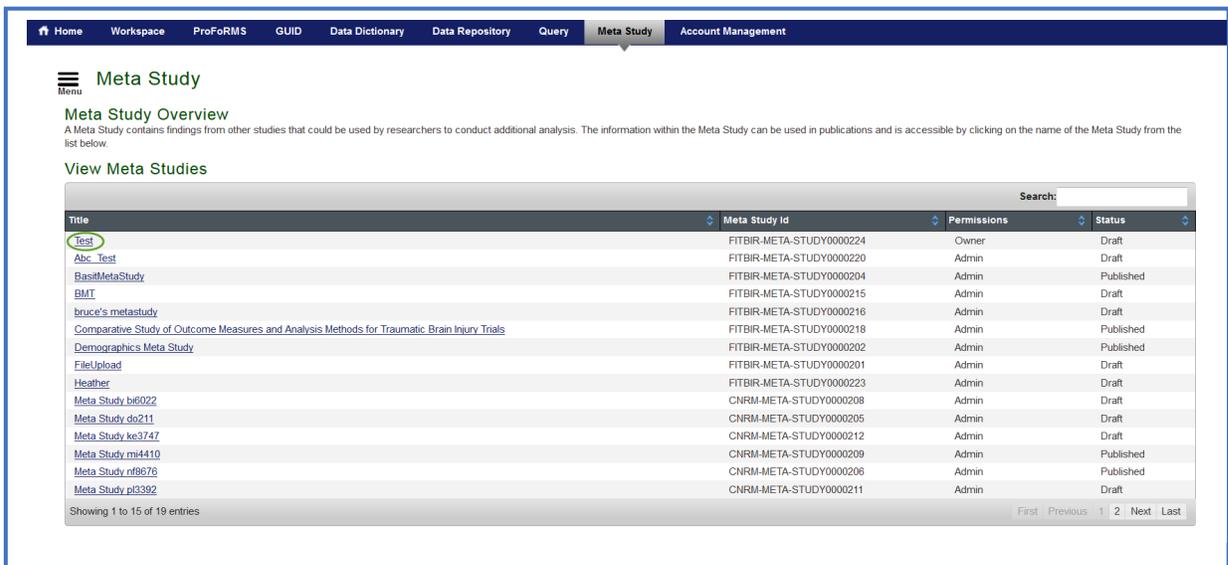

**Meta Study Overview**  
A Meta Study contains findings from other studies that could be used by researchers to conduct additional analysis. The information within the Meta Study can be used in publications and is accessible by clicking on the name of the Meta Study from the list below.

5. The **View Meta Study** page appears. Click on the **Edit Permissions** link located on the upper right-hand corner.

The screenshot shows the 'View Meta Study' interface for a study named 'TEST'. The top navigation bar includes Home, Workspace, ProFORMS, GUID, Data Dictionary, Data Repository, Query, Meta Study, and Account Management. The main content area is divided into several sections:

- Details:** Shows study information such as Title (TEST), Meta Study ID (FITBIR-META-STUDY0000225), Meta Study ID Schema (BRICS Instance Generated), Recruitment Status (N/A), Study Type (Meta Analysis), Study URL, Duration (0 days from 2017-09-25 to Now), Status (Draft), DOI, Abstract (TST), Aims, Permission (Owner), Owner (Doe, Jon), Owner Email (jon.doe@test.com), and Study URL.
- Study Research Management:** A table with columns for Title, Full Name, E-Mail, and Organization. It shows one entry for 'Data Manager' (jane.doe, jane.doe@test.com, NIH/CIT/BRICS).
- Study Information:** Sections for Clinical Trial ID and Grant ID, both showing 'No data available in table'.
- Documentation:** A table with columns for Name, Type, Description, and Date Uploaded. It shows one entry: '\_TEMPLATE.docx' (Analysis Protocol, TEST, 2017-09-25).
- Data:** A table with columns for Data, Source, Type, Description, and Date Uploaded. It shows one entry: 'Adverse Event Search.COPY' (Saved Query, Adverse Event Search, 2017-09-25).
- Keywords and Labels:** Keywords: Bone , transplant , BMT.
- Data Access Report:** A table with columns for DOI, File Name, User Name, and Download Date. It shows 'No data available in table'.

At the bottom left, there is a 'Quick Stats' section with the following information:

- Total Number of Data File Downloads: 0
- Total Number of Documentation File Downloads: 0
- Total Number of Downloads: 0
- Total Number of MB: 0.0

Two arrows highlight specific UI elements: one points to the 'Edit Permissions' link in the top right of the details section, and another points to the 'CLOSE' button at the bottom left.

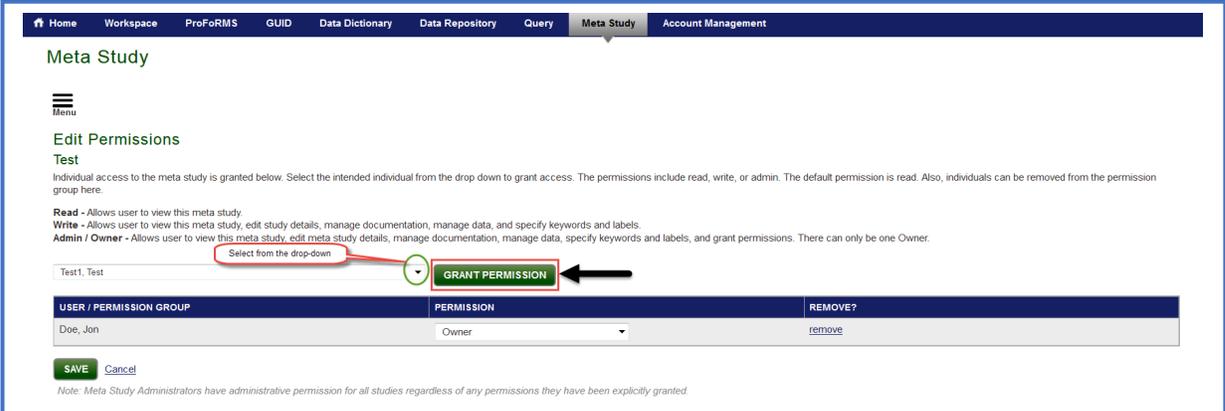

6. The Meta Study Edit Permissions page appears. **Note:** Individual access/permissions to the Meta Study include **Read**, **Write** and/or **Admin/Owner**. Select the intended individual from the drop-down to grant access. The default permission is **Read**. Also, individuals can be removed from the permission group here, meaning they will no longer have access to the Meta Study. Use the Grant Permissions button to assign the permissions after selecting the permission type.

**Read** - Allows user to view this Meta Study.

**Write** - Allows user to view this Meta Study, edit study details, manage documentation, manage data, and specify keywords and labels.

**Admin / Owner** - Allows user to view this Meta Study, edit Meta Study details, manage documentation, manage data, specify keywords and labels, and grant permissions.

**Note:** There can only be one Owner.
