

MARIO RELEASE NOTES

RELEASE DATE: July 24th, 2021

NEW FEATURES & FUNCTIONALITY

1. Submission Tool

a. Enhancements

- JavaScript submission tool has been launched that allows submission to be performed directly from the web browser
- No software installation is required

b. Improvements

- Webstart and JavaScript submission tool date/time format was updated to allow users to submit data with milliseconds and display a warning message instead of blocking the submission with an error message

2. Support of Internet Explorer 11 (IE 11)

a. Notification

- A message was added on both public and portal sites stating that we no longer support the IE 11 browser

3. Query Tool

a. Enhancements

- Ability to search by GUIDs/Pseudo GUIDs
- Added an associated GUID/Pseudo GUID column under the data table
- Ability to view the permissible value count for the data elements under the filter section
- Added the data elements details file to the query package when data is sent to Meta Study
- Data under the datasets column is linked so users can click on the dataset ID to see the detail.

4. Data Repository

a. Enhancements

- Updated a few data tables to use the scroll bars instead of pagination
- Study type and funding sources are multi-selectable

5. Account Management

a. Enhancements

- Added studies access table which displays what studies the user has privileges to and what the privilege is (read, write, owner, admin) under the account profile page

6. Public Site

a. Updates to Submitted Data page

- Updated the age years graph under the submitted data page to display private and shared data
